Anwar

Q#1 => late November

Q#2 => True

Q#3 => ~~Delivering work~~ Helping to sort & deliver p

Q#4 => Those who have good communication &
are able to work as team.

Q#5 => Early, late or night shifts.

Q#6 => Reading area.

Q#7 => false

Q#8 => £6.10 per hour

Q#9 => false

Q#10 => Elaine Grey, Personnel officer.

Q#11 => false

Q#12 => True

Q#13 => Yes / True

Q#14 => false

Q#15 => false

Signature _____

RC

No. _____

Activity Done by:- Yash-Raj

⇒ Task #1:-

⇒ AI, a branch of Computer Science, focuses on creating systems that are capable of performing tasks that typically require human intelligence. AI has many applications. One of the significant applications of AI is in the development of autonomous vehicles. These vehicles use AI algorithms to perceive their environment, navigate through complex road networks & make real-time decisions to ensure passenger safety.

One major role of AI is in cybersecurity such a manner that AI-powered systems can detect & mitigate potential threats thereby enhancing overall system security.

AI has its own role in the healthcare sector. With the help of AI algorithms, we can predict disease outbreaks & improve diagnostic accuracy.

In short, AI contributes to drive technical advancements that enhance efficiency, improve safety & transform industries.

Task #2:

- Q#1 $\Rightarrow$ B (Autonomous vehicles, cybersecurity & healthcare)
- Q#2 $\Rightarrow$ C (By detecting & mitigating security breaches effectively)
- Q#3 $\Rightarrow$ D (Autonomous vehicles, cybersecurity, & healthcare)
